1. ಅಭ್ಯರ್ಥಿಯ ವಯಸ್ಸಿನ ಜೇಷ್ಠತೆ ಮೇರೆಗೆ: –

$$\text{ಸೂತ್ರ} = \frac{\text{ಅಭ್ಯರ್ಥಿ ವಯಸ್ಸು} \times 100}{\text{ನಿಗದಿಪಡಿಸಿದ ವಯಸ್ಸು (40)}}$$

$$= \frac{\text{ಬಂದ ಪರಿಣಾಮ} \times 60}{100} = \text{ಅಭ್ಯರ್ಥಿಯ ವಯಸ್ಸಿನ ಜೇಷ್ಠತೆ ಮೇರೆಗೆ ಪಡೆದ ಫಲಾಂಶ (A)}$$

2. ಎಸ್.ಎಸ್.ಎಲ್.ಸಿ ಯಲ್ಲಿ ಪಡೆದ ಅಂಕಗಳ ಜೇಷ್ಠತೆ ಮೇರೆಗೆ:-

ಸೂತ್ರ = ಎಸ್.ಎಸ್.ಎಲ್.ಸಿ ಯಲ್ಲಿ ಅಭ್ಯರ್ಥಿಯು ಪಡೆದ ಒಟ್ಟು ಅಂಕಗಳ ಶೇಕಡ X 100 / ನಿಗದಿಪಡಿಸಿರುವ ಅಂಕದ ಮಿತಿ [illegible]

ಅಭ್ಯರ್ಥಿಯ ವಯಸ್ಸಿನ ಜೇಷ್ಠತೆ ಮೇರೆಗೆ ಪಡೆದ ಫಲಿತಾಂಶ (A) + ಎಸ್.ಎಸ್.ಎಲ್.ಸಿ ಯಲ್ಲಿ ಪಡೆದ ಅಂಕಗಳ ಜೇಷ್ಠತೆ ಮೇರೆಗೆ ಪಡೆದ ಫಲಿತಾಂಶ (B) = ಅಭ್ಯರ್ಥಿ ಪಡೆಯುವ ಒಟ್ಟು ಶೇಕಡವಾರು ಫಲಿತಾಂಶ.

ಅಭ್ಯರ್ಥಿಯು ಪಡೆಯುವ ಒಟ್ಟು ಶೇಕಡವಾರು ಫಲಿತಾಂಶದ ಏರಿಕೆಯಿಂದ ಇಳಿಕೆ ಕ್ರಮದಲ್ಲಿ (Descending Order) ಬರುವ ಶೇಕಡವಾರು ಆಧಾರದ ಮೇಲೆ ಅಭ್ಯರ್ಥಿಗಳನ್ನು ಆಯ್ಕೆ ಮಾಡತಕ್ಕದ್ದು.

3. ಮಹಿಳೆಯರಿಗೆ ಶೇ. 10% ರಷ್ಟು ಗುರಿಗಳನ್ನು ಮೀಸಲಿರಿಸತಕ್ಕದ್ದು. ಮಹಿಳಾ ಅಭ್ಯರ್ಥಿಗಳು ಅರ್ಜಿ ಸಲ್ಲಿಸದೇ ಇದ್ದಲ್ಲಿ, ಪುರುಷ ಅಭ್ಯರ್ಥಿಗಳಿಗೆ ಸದರಿ ಗುರಿಗಳನ್ನು ಹಂಚಿಕೆ ಮಾಡತಕ್ಕದ್ದು.

- ಈಗಾಗಲೇ ಕುಟುಂಬದ ಸದಸ್ಯರೊಬ್ಬರಿಗೆ ನಿಗಮದಿಂದ ಪ್ರವಾಸಿ ಟ್ಯಾಕ್ಸಿ ಪಡೆದಿದ್ದರೆ ಅದೇ ಕುಟುಂಬದ ಮತ್ತೊಬ್ಬ ಸದಸ್ಯನಿಗೆ ಈ ಅವಕಾಶ ಇರುವುದಿಲ್ಲ. ಕುಟುಂಬದ ಸದಸ್ಯರು ವಿವಾಹವಾಗಿ ಪ್ರತ್ಯೇಕವಾಗಿ ವಾಸವಿದ್ದಲ್ಲಿ, ಅರ್ಜಿ ಸಲ್ಲಿಸಲು ಅವಕಾಶ ನೀಡಲಾಗಿದೆ.

ವಾಹನ ಸಾಲ ಮೇಳ:

GOVERNMENT OF MYSORE

MANUAL

OF

THE MYSORE GEOLOGICAL DEPARTMENT

(Revised Edition)

BANGALORE:
PRINTED BY THE DIRECTOR OF PRINTING, STATIONERY AND PUBLICATIONS AT THE GOVERNMENT PRESS
1958

INTRODUCTION.

The Mysore Geological Department was organised to function from 1st October 1894, with its objects, as then defined, being Geological Survey and Mapping, Mineral Survey and Exploration and Inspection of Mines on the Kolar Gold Field. Gradually, the scope of work of the Department was enlarged and today it forms one of the important technical organisations of Government which has, by its useful work in the field of Applied Geology, been responsible for the establishment of a number of mineral industries in the State.

The activities of the Department, at present, fall under the following groups :—

(1) Mineral Survey and Exploration.
(2) Geological Survey.
(3) Mining and Marketing of Minerals.
(4) Administration of Mines and Minerals.
(5) Furnishing Geological opinion on Engineering and Water Supply Schemes.
(6) Geological Laboratory and Museum.
(7) Chemical Laboratory to analyse rocks and minerals.
(8) Metallurgical Laboratory to investigate problems on Ore Dressing and Utilisation of Minerals in Industries.
(9) Working of Special Schemes under the Five-Year Plans relating to Mineral Development and Utilisation.
(10) Compilation of Mineral Statistics, Publications, training imparted to Students in Applied Geology and other special investigations.
(11) Issue of Licenses for quarrying building and ornamental stones.
(12) Special Schemes of Geological and Archaeological interest in respect of preservation of Stone monuments.

In this connection, it may be stated that in the earlier years, Geological Survey and Mapping formed the main item of work in the Department. Between the years 1936 and 1949, a separate unit for conducting Geophysical Surveys in mineral bearing zones was organised as the first of its kind in India. In the year 1950, these two Surveys—Geological and Geophysical—were taken over by the Geological Survey of India under Federal Integration Scheme. Consequently, the officers of the Department are now denied of the opportunities of regularly undertaking investigations under these two surveys. But geological surveys in selected areas are conducted during the Mineral Survey and exploration and also under Engineering and Water Supply Schemes.

In the year 1916, the Department compiled and issued a manual for regulating the work of the Office of the Director. This manual, though a revised one, has not superseded it, is not being followed owing to changes in the administrative set-up of the Department from time to time. Besides, the work of the technical staff of the Department had not been included in that manual. It has, therefore, become necessary to issue a manual incorporating the functions of the staff in all branches of work of the Department. In compiling this manual, some information contained in the previous manual has been incorporated with certain alterations, to the extent necessary.

Certificate.

No certificate shall be given to any member of the office except under the signature of the Director.

All correspondence should be condensed as much as possible and repetitions and unnecessary details avoided.

Distribution of Papers.

All official covers addressed to the Department shall be opened by the Director or the Senior Geologist. The Senior Geologist will mark on each letter the date of receipt and send it to the Manager for further action, with such instructions as may be necessary in respect of letters requiring immediate attention. The Senior Geologist will also note, with his initials, the number of days within which a letter should be submitted, with references, if any, for orders. For proper reasons an extension of the time first prescribed may be granted in writing.

Classification of Papers.

All papers received in the office shall be classified as follows:—

1. Ordinary or routine,
2. Urgent,
3. Important,
4. Immediate,

Papers requiring the attention, without delay, of the persons to whom they are addressed whether at the office or at their private residences should be marked urgent.

Papers requiring more than usual personal attention of the ordinary authority should be marked important.

Papers requiring immediate attention should be marked immediate and placed at once in the hands of the person to whom they are addressed whether by night or by day.

When any paper is marked confidential, the Director or the Senior Geologist so marking it shall indicate by whom it shall be dealt with and the official so indicated shall be responsible for the maintenance of secrecy. The marking may be made either by the Director or the Senior Geologist.

The entries of the confidential papers in the office registers should be made from slips furnished by the Senior Geologist or the Manager and should be very general, sufficient merely to admit of the papers being traced.

Confidential papers must be kept in the personal custody of the Senior Geologist or the Manager until orders are obtained for their transfer to the Record Room.

When confidential papers are sent out of office, they should be put in double covers, the inner one being sealed and marked "Confidential" and superscribed only with the name of the addressee and the outer one bearing the usual official address.

Receipt and distribution of letters in the Office.

After the perusal of the letters by the Director and the Senior Geologist, the letters other than those which are of confidential nature, shall be sent to the Manager who after studying them will mark out the letters to the different sections or branches in the office. The Manager will note separately in a register the letters which require special attention or to be urgently replied and see that such letters are attended to without any delay.

Letters of confidential nature will be separately handed over to the Manager in person to whom instructions regarding their disposal will be issued either by the Director or the Senior Geologist.

Each branch or section in the office will maintain a register of the letters received into the branch. A similar register for the outgoing papers or files shall also be maintained.

The Manager will always have an overall picture and personal knowledge of all matters and shall call upon the case workers to put up such references when they are required for immediate disposal of papers.

The Manager shall be free to adopt or implement such course of action as he considers necessary or expedient, and open subsidiary registers, the maintenance of which should ensure cumulatively speedy and efficient disposal of papers in the office.

Correspondence Registers.

The following Registers shall be maintained for the registration of all papers received into and issued from the Department :—

(1) Receipt Register ; (2) Despatch Register ; (3) Unofficial Register ; (4) Tappal (Post) Book ; (5) Local Delivery Book (Four books at a time).

Receipt Register.

The Receipt Register is a register of communications of every description received in the office. It shows the number and date of the communication, the number of the file in which it is placed, intermediate disposal, if any, with number and date and the final disposal with number and date and remarks.

Entries in the Receipt Register should be consecutively numbered and the numbers noted on the papers to which the entries relate.

No communications received in the office may be excluded from the Receipt Register without special orders.

Issue Register.

The Issue Register is a Register of all communications issued from the office and similar in form to the Receipt Register. Entries in the Issue Register should be consecutively numbered. No communication will be sent out of the office without an entry being made in the Issue Register.

Unofficial Register.

Cases which are unofficially referred by or to other Department or Government shall be entered in a register called the "Unofficial Register" which should show the dates of receipt, despatch and return and the subject of such cases.

A complete list of papers of a Departmental file referred unofficially to another Department should be kept with the file and a duplicate list retained in the office.

Recorded papers of other Departments received on requisition, etc., should, when done with, be returned unofficially to the Department concerned, a list of them being entered in the Unofficial Register.

Special Registers

These relate to registers of various kinds to be maintained in different sections of the office and depend upon the nature of information to be recorded therein. Details of registers to be maintained in each section are separately noted while dealing with the functions under each branch or section of the office both in the administrative and technical Division.

Noting.

Where a letter has been registered, it should be referenced and noted on for submission.

Papers to be put up.

The reference clerk must carefully read through the letter and its enclosures, if any, to be submitted and with the help of the registers and indexes trace and put up the connected records or precedents whether actually quoted in the letter or not, which are relevant to the question under discussion or are likely to be required for the disposal of the case.

Series and Forms of Note.

There should be only one set of notes for each case. They should be written upon paper of foolscap size with a quarter margin and on both sides of the paper.

Language of Notes.

All notes shall be temperately written and shall be free from persona remarks. The history of the case to be put up should be brief and to the point. Reference to rules or procedure must also be given wherever necessary.

Separate file should be opened for each subject or case and be serially numbered. The serial number of the file should be entered at the top of the case sheet. When a note or series of notes extends beyond two pages, the pages as well as the paragraphs should be numbered. It is also desirable that all papers in a file relating to the same subject should be also chronologically numbered.

Order of Notes.

Notes should be written as far as practicable in the order of the serial numbers of the papers of the file. Any interruption in the general series of notes occasioned by the submission of a letter independently of the file should be provided for by bringing at the earliest opportunity the notes on the letter separately submitted into the general series.

Linking of Cases.

The linking of cases should as far as possible be avoided. Linked cases may occasionally be necessary. But cases should be consolidated, whenever practicable, into one file by an intelligent selection and arrangement of papers.

Time for submission of cases.

Ordinarily the maximum time allowed for the submission for orders of letters and cases is five clear days; but simple letters and references which do not require much referencing, also unofficial references which will have been fully noted on in the Referring Department, should be submitted the day after receipt of the reference in the office. If for any reason, a longer period than five days is required to get any cases or classes of cases ready for submission, the permission of the Senior Geologist must be obtained. Urgent letters and cases and all telegrams requiring orders must invariably be submitted on the day on which they are received. Cases marked "Early" should, if possible, be submitted on the date of receipt, but never later than the day after receipt in the office.

In very urgent and important cases special responsibility rests on the Senior Geologist and the Manager to see that no delay occurs at any stage either in or outside the office, without the matter being reported to the Director. In such cases the ordinary rules for submission may, when necessary, be curtailed or even dispensed with.

Notes and drafts submitted to the Director must be initialled by the Senior Geologist, who will be responsible that cases are properly and fully referenced, and where he does not draft or note himself, that the notes or drafts put up are correctly and properly prepared.

Regulation etc.

Regulations, rules, standing orders and books referred to in a case under submision should be put up with the file.

Draft Letters.

A draft letter may be prepared at any stage of a case if it appears that the consideration and the disposal of the case would be facilitated by submitting it with a draft.

Language and construction of drafts.

The first object of the draft is to convey the intention of the orders The language should be courteous, but concise, clear and incapable of misconstruction. Lengthy sentences, abruptness, redundancy, circumlocution, magniloquent phrases, superlatives and repetitions whether of expression or ideas must be carefully avoided

Whenever the notes and orders admit of it, they should be incorporated verbatim in the draft, but when this is not the case the drafter must use his discretion in condensing or expanding the notes. The hand writing of the drafts must be compact, neat and perfectly legible, and no abreviations other than those that are in common use must be employed.

It is ordinarily unnecessary to recapitulate fully the contents of a letter under reply at the commencement of the draft. The number and date of the letter should be quoted, and the subject, briefly. Where arguments have to be replied seriatim an abstract of the particular point taken up may be given in the paragraph which contains the reply; but even this is unnecessary where there are several such points, and it will often be better simply to refer to the paragraph of the letter under reply which contains the points treated of.

The Senior Geologist shall examine drafts of all letters, by whomsoever drafted, with the same care and the same sense of responsibility for their contents as if they had been drafted by himself. He must point before issue any errors or omissions, either in substance, language, grammar or punctuation that he notices.

Typing of Letters.

All copying work in the office should be done by means of typewriters and the office shall have the requisite number of Typewriters and the Typists. One or two of the junior clerks should also be trained in typing work to get through the heavy work at times and in times of emergency.

Fair copies of letters sent for typing must be sent for signature not later than the third day after the receipt of the approved draft of ordinary and routine nature by the Typist.

Short letters and endorsements which do not involve copying of lengthy enclosures and notes should ordinarily be faired and submitted for signature on the day they are sent to the Typist.

Urgent letters must be faired and issued on the day they are approved or early the next day, and immediate letters at once.

The quality and description of the paper for fair copying should be suited to the importance of the communication and the position of the person or official addressed.

Every fair copy sent up for signature must be carefully examined by the Manager or the Heads of Sections, the initials of the typist and the examiner being entered at the foot of the office draft and the fair copy. Copies of enclosures should also bear the initials of the examiner.

Where circular-letter numbering over fifty are to be issued, duplicating machines shall be employed to get as many copies as are required.

Despatch of Letters.

Papers must be despatched on the day they are signed or on the following working day. Abnormal delay in the issue of letters must always be reported to the Director by the Senior Geologist whose duty it shall be to check the despatch register periodically at least once a month.

The despatcher is responsible for the despatch of letters, covers sent out of the office whether through the post or by peons. He should write complete address on the letter legibly and see that the number of the references sent are entered on the left hand side top and his signature attested at the left hand corner at the bottom. Names of Post offices and the Districts should be written in block letters.. Entries in the despatch register should also be correctly written up. He should keep himself informed of the hour of posting of various mails and should have always copies of latest postal notices. In the case of covers delivered by hand he should satisfy himself that they have been duly delivered and a receipt or attestation obtained in the Delivery Book.

Valuable papers such as mineral leases and licenses, refund bills, publications and important notices should be invariably registered for acknowledgment when sent through the post. Post office receipts covering the registration of letters and parcels should be filed or pasted in the Post Book. Stamps affixed for posting letters by ordinary post should be entered then and there in the Stamp Account Book as well as in the Post Book.

Service Postal Stamps.

An account shall be maintained by the Despatcher of all service postage stamps obtained from time to time and utilised in the despatch of letters. The Manager will check the Stamp account book and the stock of Stamps on the last day in the week and also at the time of placing indents for the purchase of Stamps.

Reminder Register.

This register should include official issues from the office to which replies are pending. A case should be brought into this register as soon as an official letter soliciting a reply therefor, issues from the office. This

register is intended to help the issue of timely reminders and to expedite the disposal of the case. Reminders except in urgent cases should issue once a fortnight.

On the 5th and 20th of each month, the reminder register should be sent up to the Senior Geologist with a list showing cases in which it is proposed to issue reminders. After approval by the Senior Geologist a reminder in the prescribed form should be issued to the authority concerned.

Reminders issued and replies received should be noted in the register and when a letter has been fully answered the entry relating to it in the Reminder Register should be scored out.

Every branch of the office shall maintain a reminder register in the manner prescribed above.

Pending papers with Clerks.

Every clerk shall prepare once a month a list of references pending with him classified under the following heads:—

(1) Pending for less than a week.

(2) Pending for more than a week and less than a month.

(3) Pending for more than a month and less than two months.

(4) Pending for more than two months.

Reasons for the delay and the fact whether extension of time has been obtained should be stated whenever necessary.

Arrears List.

The Senior Geologist with the help of the Manager shall prepare a consolidated statement of cases in arrears in the whole office at the beginning of every month and submit the same not later than the 5th of the month for the inspection and orders of the Director.

Personal Registers of the Office Establishment including Drawing Branch.

The Senior Geologist shall see that the Manager, all the clerks and the staff in the Drawing Section maintain Personal Registers individually and submit the same for scrutiny once a month to the Director on or before 10th.

Periodical Returns and Reports.

A list of periodical reports and returns due from the offices shall be prepared with a time table and duly revised from time to time. The Senior Geologist shall see that all the reports and returns as listed in Appendix 'A' are forwarded punctually from the office to concerned authorities.

Similarly a list of periodical reports and returns due to the Department shall be prepared with a time table and duly revised from time to time. The Senior Geologist shall see that all reports and returns as listed in Appendix "B" are forwarded to the office punctually by the concerned agencies.

A list of Circulars and instructions issued by the office of the Public Service Commission in the State will also be maintained to facilitate adoption of measures in matters of recruitment of staff to the Department.

A list of Circulars issued by the Stores Purchase Committee shall also be maintained for reference and guidance in the office.

Press Register.

A Press Register shall be maintained showing all papers sent to the Press for printing, the dates on which the proofs were received and returned and the date of receipt of printed copies. Reminders should be sent to the Press when proofs or printed copies are not received within a reasonable time. In returning proofs to be struck off, the number of copies to be printed and any other instructions for the Press should be recorded thereon.

Distribution of Departmental Publications.

A standing distribution list of the publications issued from the Department should be maintained and changes and additions should be entered therein from time to time with reference to the Orders under which they are made.

The Manager will be responsible to see that the Publications issued from the Department are regularly and promptly distributed in accordance with the Standing List.

(1) Standing Orders and Circulars.

(2) Mysore Financial Code.

(3) Mysore Service Regulations.

(4) Mysore Treasury Code.

The executive officers and members of the Ministerial establishment should pass the prescribed tests and "Accounts Higher" Examinations. There has so far not been any tests prescribed for the Departmental work. With the several sets and Rules of the Government of India for the Administration of Mines and Minerals becoming operative in the State, it seems desirable that Departmental tests for officers and establishment are conducted periodically similar to tests or examinations in other Departments of Government.

The nature of business transacted and procedure to be followed in different sections of the office are somewhat varied. In conformity with the needs of each section or branch separate rules and procedure for the conduct of work have been prescribed and these are dealt with in Chapter III.

CHAPTER IV.

In the introductory chapter the nature of scientific work carried out by the Department has been broadly outlined. In general no hard and fast rule can be laid down regarding the manner in which the surveys have to be conducted. The technical officers are expected to apply their talents in the best possible manner and undertake the works allotted to them for execution. They have, however, to chronicle the observations, prepare notes, collect data in respect of the investigations they have to take up and submit to the Director periodical reports of the progress achieved. They must evince keen interest and show incentive for original work to enable the administration to give encouragement to the talents they possess if they contribute to the efficient working of the Department in the field of investigation.

The work of the technical officers of the Department falls under the following categories:—

(i) Work by Geologists and Assistant Geologists.
(ii) ,, Chemists and Assistant Chemists.
(iii) ,, Metallurgist and his assistants, if any.
(iv) ,, Drilling Unit.
(v) ,, Special Schemes.

Geologists, Assistant Geologists and the personnel of the Drilling Unit have the following functions:—

(i) Mineral Survey and Exploration.
(ii) Geological Survey in selected areas relating to (i) above and also in connection with questions of Engineering and Water Supply referred to the Department.
(iii) Administration of Mines and Minerals—Inspection of blocks granted under mineral concessions.
(iv) Investigations in the Geological Laboratory and Museum.
(v) Preparation of reports on the investigations for publication.

The work under items (i) to (iii) above necessitates touring by the officers which will ordinarily be arranged during the Field Season in a year. The Field Season commences from the middle of November and closes by middle of May of the following year. The officers—particularly under (ii) and (iii) are also required to tour during the remaining months also when such journeys have to be undertaken in cases of urgent necessity.

Before the commencement of the Field Season, a programme of work will be drawn up and the officers who are placed on definite charges shall camp out during the entire Field Season. During this period, they shall submit weekly progress reports of the work done by them. They will also submit monthly reports and consolidated reports of specific works as soon as they complete such assignments. Tour journals have to be sent along with the T.A. particulars for scrutiny by the Director preparatory to the acceptance of their claims.

Submission of the reports in the above manner will also apply to officers who go on inspection of mines and attend to surveys relating to Engineering and Water Supply Problems. In any case, reports of such inspections shall be submitted with minimum delay however not later than 10 days after the completion of the work. In matter of urgency they may be required to furnish their reports earlier.

After the Field Season, the officers return to Headquarters and they shall be engaged to write up reports of work done by them in the field. A calendar will be prescribed for the submission of reports. Progress reports shall be submitted once a week while the officers are at Headquarters.

Normally a Geologist shall put in at least 180 days and the Assistant Geologist 210 days of touring in a year. They may also be required to put in more days of work in cases of emergency.

The Field Season does not apply to officers detailed for inspection of areas granted under mineral concessions. But the officers in charge of this work have to draw up a programme of work and get the same approved by the Director.

The duty of the inspecting officer shall be to see whether the work on the P.L. and M.L. blocks is in conformity with the Rules under which the mineral concessions are granted. To this effect they will inspect the stocks of minerals produced, transported and railed and check them with the account books maintained and the returns sent to the office. They shall also report on questions relating to the safety of the workings on the blocks, amenities provided for labour, mine plans and other allied matters.

The field officers shall report after their work new finds or discovery of economic mineral deposits and make all information available to the Department with maps, sections, plans and sketches.

The Director and the technical officers shall meet frequently to discuss matters relating to the Departmental work and other technical matters, and to co-ordinate work in the Department.

The touring officers shall take proper care of the Government articles such as tools, tents and tent equipage, etc., issued to them for their use in camp. They will be personally responsible for their safe return to the office on their return.

Chemical Laboratory.

This Laboratory will be in charge of a Chemist (when the cadre contains two or more Chemists, the Senior-most Chemist) and he will be assisted by Assistant Chemists. Analysis of ores, minerals and rocks both for the Department and for the public will be undertaken. The officers of this section shall also take up special investigations of scientific nature and of economic value. They will submit weekly progress reports to the Director and keep him informed of the special investigations. A programme of special work they propose to undertake will be drawn up and the approval of the Director sought in the matter. They shall exercise proper care in the use of the chemicals, instruments and appliances and they will be personally responsible for their proper maintenance and safety.

A stock book of chemicals and appliances shall be maintained. The issue of chemicals and glassware shall also be noted in a separate register.

This Laboratory will be in charge of the Metallurgist who is responsible for all investigations conducted in the Laboratory. He shall, in the commencement of the year, draw up a programme of work and get the same approved by the Director.

Fortnightly reports of the progress of the work done in this Laboratory shall be submitted to the Director. Reports of the investigations completed shall be submitted as soon as the work is completed.

The Metallurgist shall be personally responsible for the proper working and the safety of the machinery and appliances of the Metallurgical Laboratory. He shall maintain a stock book of the articles, machinery and plant and show their use or disposal.

Use of the Chemical and Metallurgical Laboratories by the Geologists and Assistant Geologists.

These two laboratories shall be available for use of the Geologists and Assistant Geologists when they wish to carry on special investigations relating to their field work. The officers working in the Laboratories shall carry on the work without causing any inconvenience to the work of the officers of these Laboratories.

Diamond Drilling Unit.
